<https://github.com/DarkZero81>

Aspiring Full-Stack Web Developer with a solid foundation in both frontend and backend technologies (HTML, CSS, JS, PHP, Laravel). Passionate about building responsive, user-friendly web applications. Currently honing my skills through intensive professional training at Osus Center. Quick learner with strong problem-solving skills and a background in digital content creation and customer service

EXPERIENCE

Shop assistant & Manager (part time) | family-owned stationer shop - Damascus, Syria (2019-Present)

- Managed daily operation of student supply shop independently.
- Handled inventory tracking, procurement, and stock optimization to meet customer demand.
- Provided professional communication and conflict resolution for a diverse customer base, building strong interpersonal skills.
- Balanced full-time university studies with professional responsibilities, demonstrating exceptional time management

Technical projects

- Full-Stack E-commerce Platform: Designed and implemented a comprehensive digital storefront with product management and user shopping features (PHP, Laravel, MySQL, Bootstrap).
- Restaurant Management System: Developed an automated platform for menu browsing and digital order processing.
- Secure Authentication System: Built a robust user registration and login framework with encrypted data handling.
- Task Management Application: Created a productivity tool (To-Do List) utilizing full CRUD (Create, Read, Update, Delete) functionality to manage data flow.

EDUCATION

- Al-Saadeh high school, Damascus, Syria | Final score: 95.3 (Graduated 2023)
- Bachelor of Information Technology, ITTIHAD PRIVATE UNIVERSITY, Damascus, (2023-Present)

Current Status: Third-Year Student
